

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: claims 13-16, 18-28, and 32-54 are allowable because the instant application is directed to a nonobvious improvement over the invention described in patent number US 7,307,623 (Enomoto) and patent number US 5,327,163 (Hashimoto). The improvement comprises *applying the first specific processing rule of the first graphical object as a function of a relative position between the first touch position and the first object position; applying the second specific processing rule of the second graphical object as a function of a relative position between the second touch position and the second object position; and modifying at least one of the first graphical object or the first object position based on a result of said applying the first specific processing rule; and modifying at least one of the second graphical object or the second object position based on a result of said applying the second specific processing rule.* This patentable distinction is included in independent claims 13, 20, and 54.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
